

Le Classique Beauté Collectif

How to import database into a computer using xampp.

MySQL username: root

MySQL password:

(When you encounter login in MySQL just type **root** at the **username** and

ignore the password because it does not have a password)

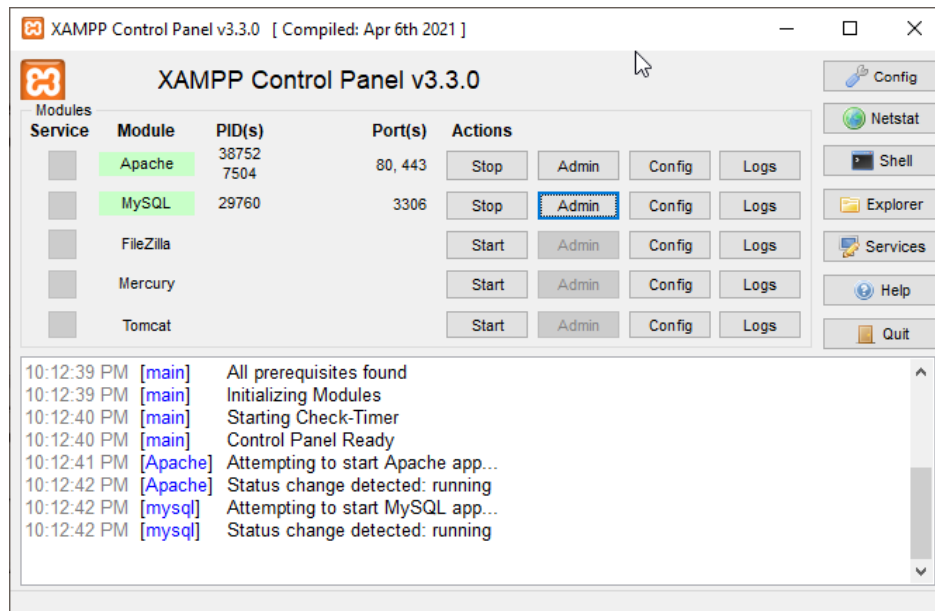

Fig 1. Run Apache and MySQL

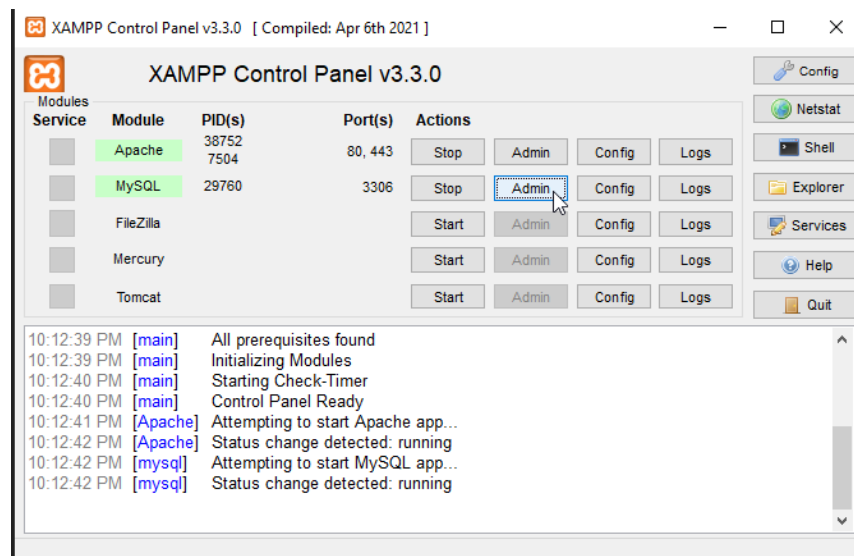

Fig 2. Click “Admin” button at MySQL.

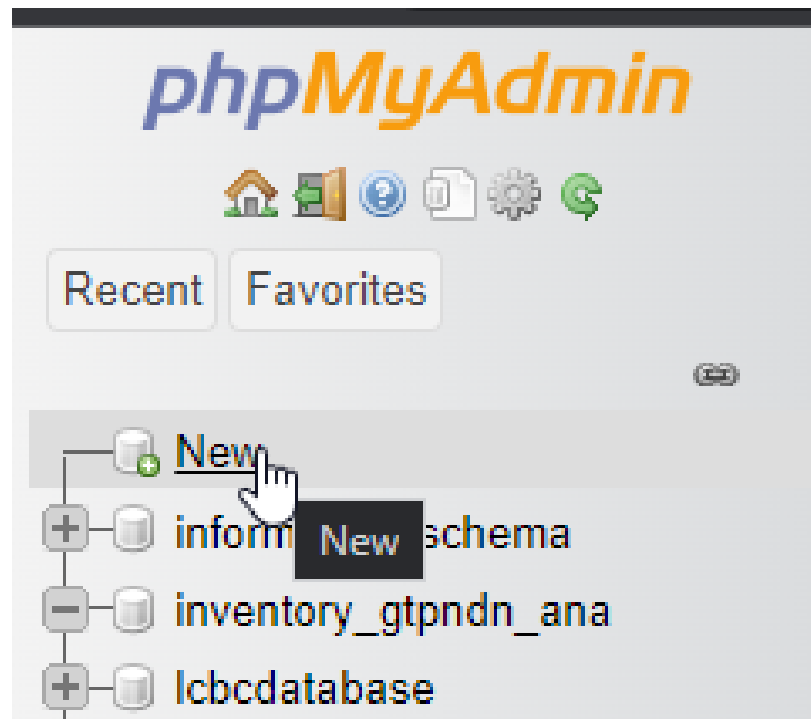

Fig 3. One you're into localhost/phpmyadmin/index.php click "New".

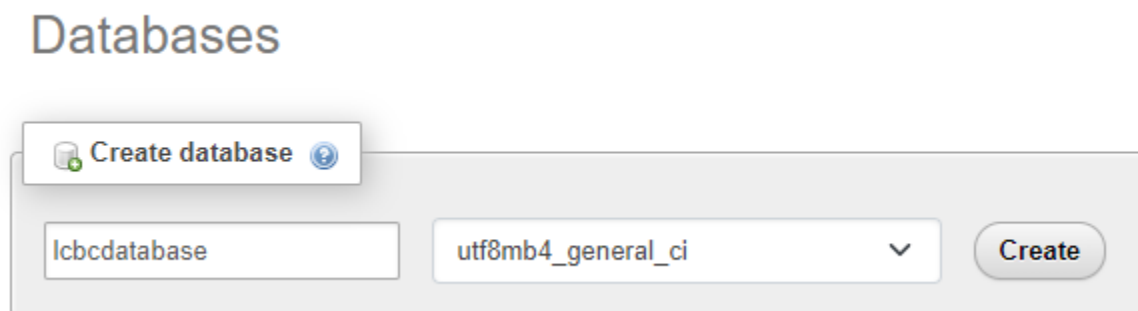

Fig 4. Once you are here, put the database name "lcbcdatabase" and click "Create" button.

Tip: you cannot change the database name. Because the code only determines the database is named "lcbcdatabase"

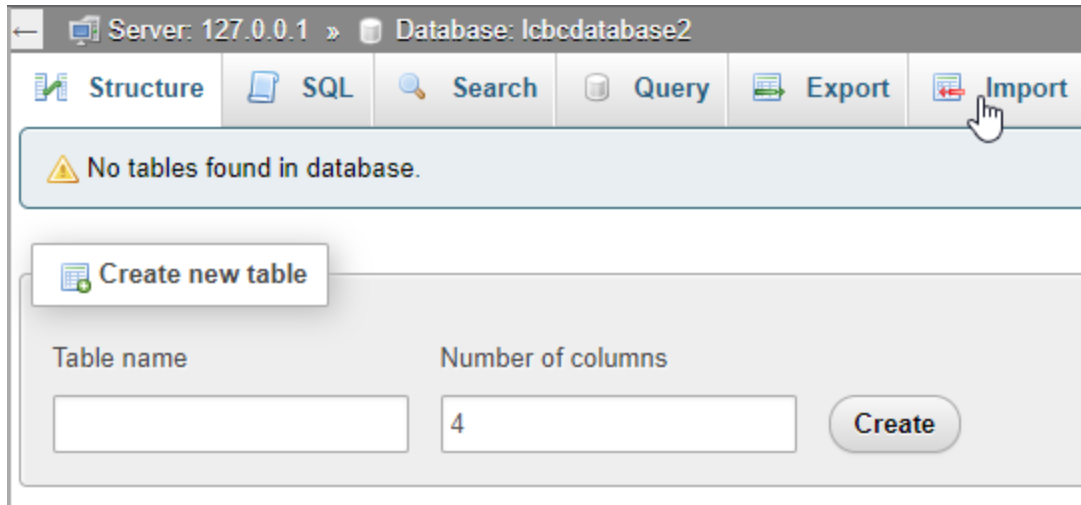

Fig 5. Once you clicked “**Create**” button click the “**Import**” button.

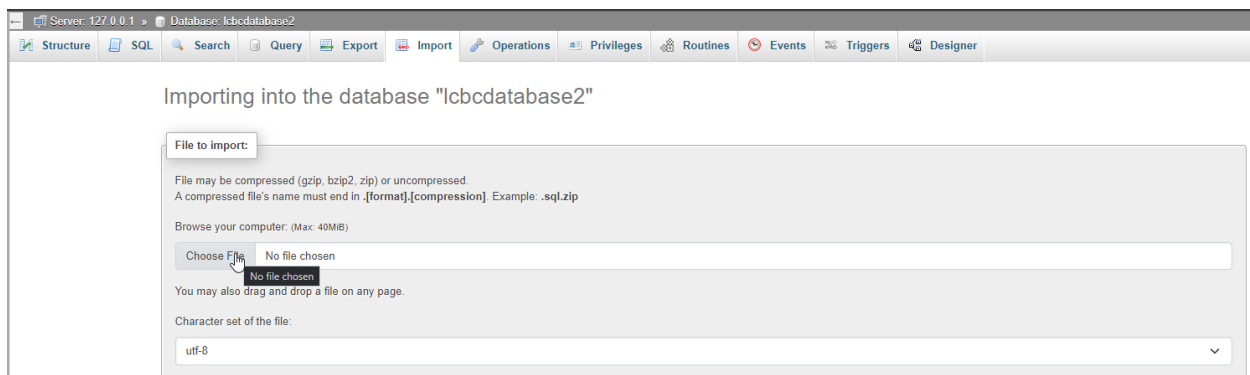

Fig 6. Once you clicked “**Import**” button. Find the database file named “**lcbcdatabase.sql**”

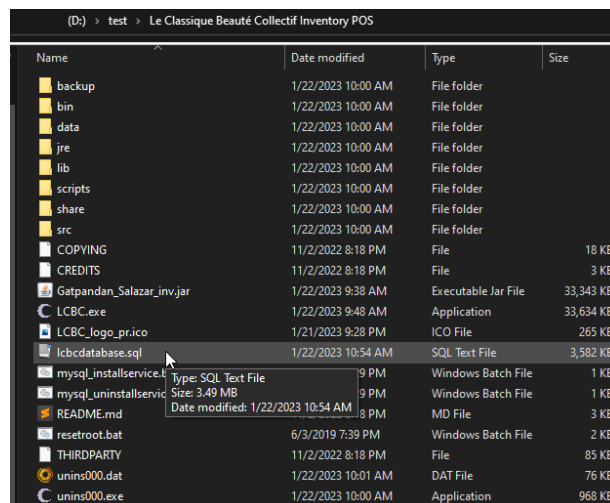

Fig 7. You will find that file where you install the program.

Ex: “**YOUR DRIVE:\Le Classique Beauté Collectif Inventory POS**”

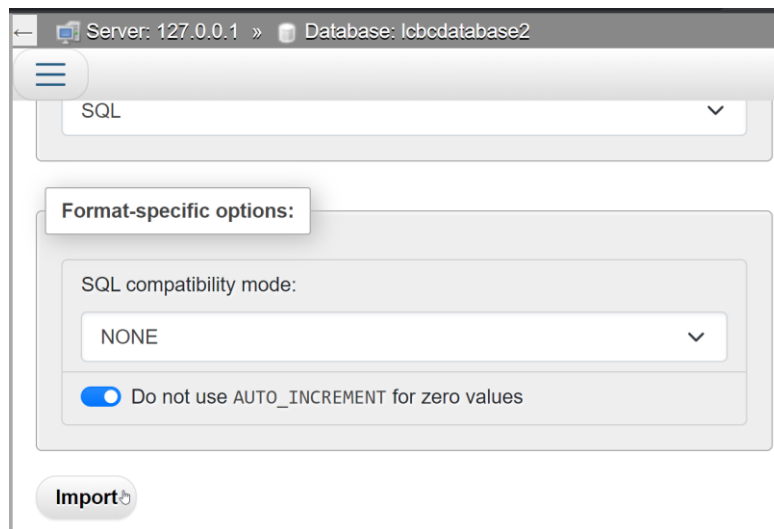

Fig8. Scroll down to find the “**Import**” button and click it.

Fig 9. Once you saw this, you are all set.
